PROFILE

Result-driven Test Engineer with over 3 years of experience in designing and executing test cases across various domains. Proficient in both manual and automation testing, with a proven track record of enhancing product quality and optimizing testing processes. Seeking a role where I can leverage my skills to contribute to high-quality software development.

WORK EXPERIENCE

Aria Aerotech Pvt Ltd

Test Engineer
Sept 2021 - Present

CRM Domain

Conducted comprehensive testing for a CRM system designed to manage customer interactions, sales tracking, and support ticketing. Focused on ensuring system reliability, performance, and adherence to requirements. This web application supports B2B (business-to-business) operations and centralizes customer information storage.

- Responsible for understanding the application requirements and the customer business workflows.
- Involved in reviewing the test cases of team members.
- Prepare test scenarios and test cases for Smoke, Functional, Integration, System & Ad hoc testing.
- Involved in executing test cases and conducting Smoke, Functional, Integration, system & Ad hoc testing.
- Interacting with the development team & stakeholders regarding issues.
- Involved in sprint planning, daily Scrum, sprint review & retrospective meetings.
- Analyse and track defects using JIRA as a defect tracking tool.

Health Care Domain

It is a B2C application used to monitor hospital activities. Conducted comprehensive testing for healthcare management system aimed at improving patient care and streamlining administrative processes within a hospital network. These include managing patient records, scheduling appointments, handling billing & generating reports.

- Developed detailed test plans based on requirements.
- Created and maintained test cases.
- Executed test cases and documented results.
- Performed various types of testing including Smoke, Functional, Integration, System & Ad hoc testing.
- Submitted daily status reports.
- Logged and tracked defects using JIRA tool.

TECHNICAL SKILLS

- Hands-on experience in creating Automation Test Script in Selenium & FireFlink.
- Hands-on experience in API Testing using Postman & Fireflink.
- Hands-on experience with Newman report generation and Defect tracking in Fireflink & Slack platform.
- Good knowledge in Mobile Application Testing using Fireflink.
- Proficient in building UI element repositories for both web & mobile applications.
- Very good knowledge of AI-based NLP (Natural Language Processing).
- Strong understanding of sequential and parallel execution in different environments using FireFlink.
- Skilled in debugging failed steps and analyzing test results.
- Experienced in executing tests on cloud platforms such as BrowserStack & LambdaTest using FireFlink.
- Basic knowledge of Linux commands, Git & GitHub.
- Good knowledge of SQL database.
- Good knowledge of Python and Java programming languages.
